

iCore Prepaid Gateway

The demand for prepaid services is growing in every market, large and small. Whether it's tourists, business travelers or first-time wireless subscribers, prepaid services can greatly increase your network subscriber base and profitability. Prepaid services allow rapid revenue generation and faster deployment to emerging markets.

System Capabilities

- Can be deployed as an adjunct to existing wireless and/or wireline networks, or as part of an integrated network
- Fully flexible distributor/rate plan with up to 700 different rate plan options
- Create off-peak and discount periods
- Specify separate airtime and land rates
- Landline rate based on destination
- Operator flexibility to selectively block out an account for any reason
- Dial-in access for calling cards, prepaid cards
- Account re-charge via prepaid card or dial-in access
- Account code and PIN generation
- Pre-set account expiration

Features

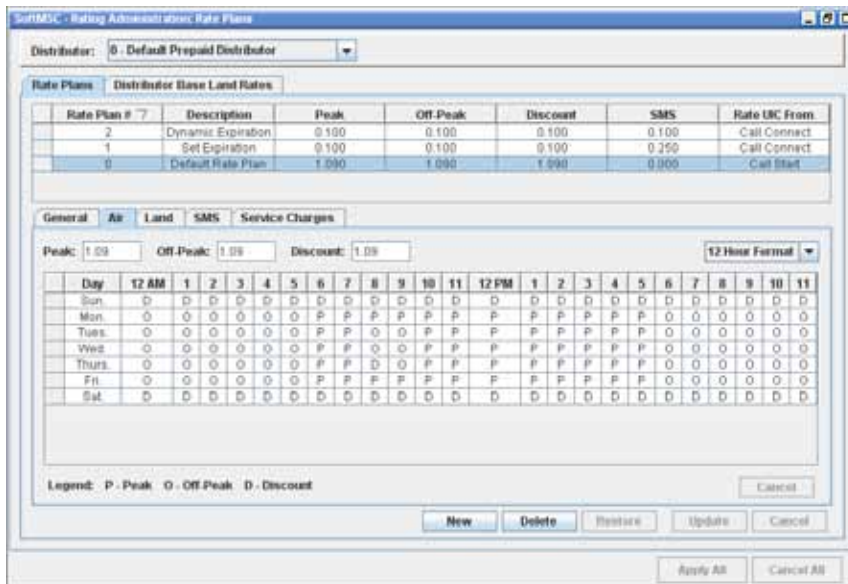

- Real-time debiting and call disconnect
- Per-second precision billing
- 700 distributor/rate plans
- 24x7 airtime matrix
- Balance notification via announcement, SMS and USSD
- Prepaid roaming
- Integrated into iCore Platform or available as a standalone system
- Software based, rapid deployment
- Account based or top-up card based recharge options
- Announcements in 20 languages

Operations, Administration & Maintenance

- Provides the operator with service log reports and system level operational measurements
- Delivery subscriber and distributor summary bills

Configuration

- System and subscriber provisioning configured through powerful and intuitive GUIs
- Flexibly define distributors and rate plans
- Up to 70 distributors can be defined, with each distributor having up to 10 different rate plans
- Subscribers provisioned with a simple “check in the box”
- For each subscriber, operators can configure the maximum allowable credit limits, as well as the payment method

Rate Configuration Screen

Billing
